

Centricity High Acuity Anesthesia

Empowering caregivers in the operating room

Give your patients the best care possible

To deliver the highest level of care, perioperative clinicians need fast and easy access to comprehensive patient records. Unfortunately, disparate systems can make data retrieval difficult, bogging down workflows and complicating anesthesia management.

Centricity™ High Acuity Anesthesia is a specialized clinical information management system that enhances clinical documentation and decision-making from pre-operative assessment throughout the perioperative workflow.

By enabling care consistency, complete data documentation, and by providing advanced data analysis capabilities, Centricity High Acuity Anesthesia:

Helps to reduce delays in procedures due to incomplete information¹

Helps to increase confidence by giving clinicians access to needed data¹

Enables teams to gain 28 hours of clinical staff time per week¹

Drive the quality of perioperative care

Centricity High Acuity Anesthesia can help you work more efficiently as a department to improve outcomes

1

Help staff focus on critical priorities

- **Worklist**
Customizable worklists help simplify tasks, such as documentation, and help improve standards compliance.
- **Anesthesia schedule**
Manage multiple patients and prioritization with visibility to available resources, planned procedures and patient status.
- **Clinical notification**
Stay on top of a dynamic workload with notifications that help the team focus on the most critical patients and mitigate risks.

2

Provide better patient outcomes

- **Patient view**
Access and manage patient care from any Centricity High Acuity workstation in the network for faster clinical decision-making from pre-op to post-op.
- **Medication safety check**
Enhance patient safety and may mitigate adverse drug events via an optional integration with a certified drugs database.
- **Embedded protocols**
Customize anesthesia or post-operative treatment protocols to help improve compliance with hospital treatment plans.

3

Improve daily workflows

- **Data analytics***
Improve clinical and operational practice by monitoring KPIs, tracking billing, financial metrics and more, through a native business intelligence tool.
- **Integrated medication management**
Increase the ease and compliance of medication documentation during anesthesia and advanced post-operative order management through Hospital Information Systems integration.
- **Risk assessment tools**
Decrease error potential in pre-op and during surgery with advanced functionalities, including WHO Surgical Safety Checklist, allergies and Malampati scores.

Part of the Centricity High Acuity Platform

Centricity High Acuity Anesthesia is part of the Centricity High Acuity Platform. Our integrated approach is designed to ensure continuity of care throughout the pre-operative, intra-operative, post-operative and Critical Care environments, as well as interoperability with other IT systems and devices.
